

# DEFIBRILLATION

## EURODEFIPADS®

Eurodefipads®: a complete line of disposable multifunction electrodes for defibrillation, synchronized cardioversion, external cardiac stimulation and ECG monitoring.

Besides All Standard series, Eurodefipads® are available also in a Paediatric version with Power Reducer for AED models.

Radiotransparent models, available for adult and paediatric, have been optimized for use in EP labs, haemodynamics, during radiographic and angiographic procedures and in emergency rooms. Lead-out models have cable and terminal connector outside the pouch, allowing to connect pads to the defibrillator before opening pouch; they have been intended especially for emergency situations, in order to save time and make procedures more safe.

## TRAINER PADS

Defibrillation training pads are equipped with snap connection and must be used with the appropriate connection cable. The pad's special shape makes the application extremely easy both on dummies and on other surfaces.
